

JOURNAL OF UROLOGICAL SURGERY

EDITORIAL

Dear valued members,

We are so happy to introduce you to Journal of Urological Surgery, as the journal of Urologic Surgical Association (Ürolojik Cerrahi Derneği-ÜCD). We have dreamed of these days when the administration decided to issue this journal. We are sure that the journal is going to survive and reach to its aims because it has been brought to agenda by your wishes and we do not doubt your support. We are grateful to the authors who lent scientific support in this short period of preparation time.

We recognize that researchers and officials are bothered by long waiting process. We have the intention to accelerate this process and to take short its publish time after its acceptance. Nowadays carriage and storage of printed publication and looking for older editions are a problem. That is why this is planned as an online journal. Although the publishing priority of our journal is original research articles, review articles upon invitation to update our information, case reports, letters for editor, radiology and pathology articles relevant to urology are also going to be published. Besides, some important articles that are published in other urology journals are going to be presented to the attention of followers. Interesting new formats are going to be built through time, according to medical developments.

Reminder mails to association members will be sent to follow the journal. We wish this journal to contribute to community of urology.
